JLS Automation appoints MD Packaging as Exclusive Representative for Canada

JLS Automation has appointed MD Packaging based in Markham, Ontario, Canada as its exclusive sales and support agent in the Canadian Provinces. MD will offer the complete line of JLS systems for primary and secondary packaging automation. In addition to providing a traditional sales coverage for JLS, MD Packaging will provide technical service, support, and parts for JLS equipment throughout Canada.

According to JLS President Craig Souser “we have had a limited relationship with MD Packaging over the last few years, but felt that it was time to get serious about the Canadian packaging market. In order to do business in a country as vast and diverse as Canada, we knew it was imperative to align ourselves with a company that not only had a long history of success in selling packaging equipment in Canada, but could also provide the service infrastructure and parts availability that our clients need.”

Michael Dempster, the President of MD Packaging states “we were attracted to JLS because of their proven track record in the application of robotics in the food, pharmaceutical and personal care products industries. Their extensive knowledge of this technology, including product inspection and end-of-arm tooling, is a great asset for the Canadian marketplace, where this type of automation is becoming more essential. We look forward to a great professional relationship with JLS. We are confident that this partnership will add to MD Packaging’s value to our customers for many years to come.”

JLS Automation is a provider of primary and secondary packaging automation solutions with a focus on robotic-based technologies for the food processing industry in applications in high sanitation environments. JLS is a strategic partner to ABB and one of the largest FlexPicker integrators in North America. In addition to robotic-based automation, JLS designs and builds custom equipment to automate labor intensive tasks in the food industry.

With engineering and assembly facilities in York, PA and Boise, ID, JLS is strategically situated to service clients all over the North American continent.
